## First aid for cracks and repairs

Are you looking for a simple solution that makes repair work easy? Ultra Floor's fast setting and rapid drying mortar, Patch IT rapid45® is your perfect solution for applying 'first aid' to many different types of defect.

Ultra Floor Patch IT rapid45® is a versatile product that is a guaranteed mortar defect repair solution. The product's slump-free formulation flaunts exceptional strength and hardness qualities, and is suitable for both internal and external patch repairs. The product is an ideal material for filling holes, depressions and cracks in cementitious sub-floors and concrete stairs, as well as forming ramps and coves.

Once mixed with water the product will have a workability time of approximately 5-10 minutes and will set in 20-25 minutes. Suitable for use on vertical and horizontal surfaces, Patch IT rapid45® can be applied at thicknesses from 2-35mm and may also be used below a damp proof membrane.

Ultra Floor Patch IT rapid45® is protein free, polymer modified and shrink resistant. Available in handy 10kg bags, coverage of 2m<sup>2</sup> at 3mm depth can be achieved.

For further information on Ultra Floor Patch IT rapid45®, please visit [www.ultra-floor.co.uk](http://www.ultra-floor.co.uk), or call 01827 871871.
