## Make light work of imperfections

Ultra Floor's feather finish smoothing compound, Feather IT makes light work of patching many different surface imperfections such as ridges, uneven trowel marks and cracks. The application of Ultra Floor Feather IT will create a perfectly smooth substrate ready for the installation of a floor covering.

Formulated with exceptional bond strength, Feather IT can be applied without the use of a primer from feather up to 3mm thickness. It can be used as a scratch coat to fill wood grain and for joints between sheets of plywood.

Ultra Floor Feather IT is protein free so can be used in biologically sensitive areas. The product is polymer modified and has rapid setting properties aiding its versatility as a scratch/repair mortar. Each 5kg bag can cover up to 25m<sup>2</sup> when used as a scratch coat.

For further information on Ultra Floor Feather IT, please visit [www.ultra-floor.co.uk](http://www.ultra-floor.co.uk), or call 01827 871871.
